

# PRIVATE EYE PEST CONTROL

Ph. Or Txt @ 306.539.5863

## IMPORTANT NOTICE TO RESIDENTS

**PRIVATE EYE PEST CONTROL** will be providing an OCCASIONAL INVADER CONTROL SERVICE in your residence on \_\_\_\_\_, at \_\_\_\_\_ a.m./p.m.

All people and pets must keep vacated from the treated units for a minimum of FOUR (4) to SIX (6) hours after the treatment (unless noted otherwise). You must leave upon commencement of the work. Pregnant or nursing women, children under two (2) years old, or those with allergies or respiratory problems, must vacate for EIGHT (8) to TWELVE (12) HOURS OR OVERNIGHT. Aquariums must be covered and filters turned off. If we are just treating outside, you need to avoid the treated areas until they are dry (2 hours), and keep your windows closed during the treatment.

### TO ENSURE CONTROL THE FOLLOWING PREPARATIONS ARE TO BE FOLLOWED

- Remove everything from next to the outside walls of your residence. No firewood, no lumber, no toys, pet food bowls or barbecues please
- Cut back all vegetation and tree branches. Vegetation should be 18 inches off of the walls, and tree branches should be three feet away. Also ensure the concrete foundation is exposed; no soil up against the siding
- Reduce clutter inside. Insects hide in cluttered areas, especially those near sources of heat and moisture. Clear a space one foot to 18 inches wide away from all baseboard areas/perimeter
- Thoroughly vacuum all carpets and floor level cracks and crevices
- Clean all areas of the kitchen, especially under the fridge and stove, and anywhere else crumbs may accumulate. Clean and remove empty pop and juice containers
- Fix dripping taps or leaking pipes, roof leaks, and any gaps around windows, doors, or siding that may allow moisture inside

We understand that at times some of the preparations can not be done. Please identify anything beforehand in case it may comprise the service. Keep in mind too that any given pest circumstance may not need all preparations. This will be discussed at your consultation before scheduling the service if applicable. Ensure you do your part in preparation so that control can be prompt and effective. Upon returning home please ventilate your residence and replace all contents. Avoid touching treated areas.

Thank You for your cooperation!
