CLIENT PREPARATION CHECKLIST FOR THE CONTROL OF COCKROACHES

CLIENT NAME: _____ ROOM NUMBER (if applicable): _____

PREPARATION COMPLETED BY: _____ DATE: _____

WHAT YOU CAN EXPECT

I will use a variety of methods to eliminate the cockroaches depending on each unique case. The majority of the treatment will be focused in the areas of activity and where infestations have been detected; such as the kitchen area including around appliances, cupboards, pantries and shelving units and/or bathroom area. In most cases I will be using a bait formulation that is strategically placed at sites of cockroach activity. This is the safest and most effective and efficient means of cockroach control and normally require only one treatment. In some circumstances a combination of the bait as well as insecticide spray will be applied to assist in further control of extensive infestations. All treatments are made with your safety in mind to ensure your health and well-being.

PRE-TREATMENT PREPARATION BY THE HOMEOWNER

In order to provide the most effective service possible, I ask that before my arrival you review and complete all the necessary steps listed below. I will verify completion upon arrival. Please complete and return this form when I arrive on site. If you fail to complete the following requests it may delay the treatment and potentially void any guarantee if applicable. **Please note:** I may provide additional preparation instructions or suggest less preparation based on infestation level beforehand.

CHECKLIST

KITCHEN

- Empty **ALL** kitchen cupboards (Upper and lower) and pantries.
- Empty **ALL** drawers of cutlery, towels, etc.
- Remove **ALL** dishes, pots, pans, cans, boxes, food, etc.
- Clean and clear off **ALL** counter tops.
- Please keep **ALL** items removed within the **kitchen area** to prevent cockroaches from spreading to other areas.

BATHROOM

- Empty **ALL** items from cupboards, cabinets, under sinks and drawers.
- Please keep **ALL** items removed within the **bathroom area** to prevent cockroaches from spreading to other areas.

BEDROOM CLOSETS

- Empty **ALL** items from closets that are experiencing the signs of activity of cockroaches.
- Please keep **ALL** items removed within the **bedroom closet area** to prevent cockroaches from spreading to other areas.

FURNACE ROOMS

- Make this area accessible so it can be properly inspected and treated if necessary
- Please keep **ALL** items within the **furnace room area** to prevent cockroaches from spreading to other areas.

Additional Instructions:

POST-TREATMENT ACTIONS TO BE PERFORMED BY THE HOMEOWNER

The bait and/or spray will remain effective only if the following steps are taken after your home is serviced:

- **DO NOT** use other pest control chemicals (powders or sprays).
- **DO NOT** use cleaning products anywhere near bait and/or spray, as this will decrease or eliminate the effectiveness of the treatments.
- Remove **ALL** competing food sources (this means keeping **ALL** foods in tightly sealed containers, cleaning up spills as they occur, removing trash on a regular basis, etc.)
- You may place back all kitchen items right after the bait and/or spray treatment.

ALLERGEN NOTIFICATION

Some of the products utilized for controlling cockroaches contain allergens such as peanut butter and shellfish. Please notify me about concerns over allergens prior to the treatment.

REMINDER

If only bait is used:

It is not necessary for you or your pets to leave your home before, during or after the bait treatment. You may notice greater activity right after treatment for 1 to 2 days. This is due to the cockroaches coming out of their harborage areas to feed on the bait. Please be patient, the bait will REDUCE COCKROACH ACTIVITY to very low levels within approximately 2 weeks leading to elimination.

If spray or bait and spray treatment is used:

It is necessary for you and your pets to leave your home for 4 hours once the treatment begins. Fish aquariums may be left onsite, however they should be covered and air filters must be disconnected. Persons with underlying health conditions should consult their family physician where they have concerns regarding re-entry time. Upon re-entry, please open windows for 20 min to properly ventilate the treated rooms.
